## REMAS Greenhouse gases emission risk management in forest fires

Public presentation of main project results:

- ✓ Quantification and mapping of carbon stocks and the risk of GHG emission from forest fires;
- ✓ Measures proposed to mitigate the risk of emission and improve the capacity of ecosystems to store carbon after a fire;
- ✓ Recommendations to integrate GHG risk management into legislation and planning.

*The REMAS project is co-financed by the Interreg Sudoe Programme through the European Regional Development Fund (ERDF)*
